How to use it

- Write the starting order I-VI for each set from the lineup sheet. Position I serves first.
- Each time a libero comes in, log: which libero, the number they replace, that player's position (I-VI) and the score.
- When the libero comes out, log who replaced them. It must be the player they replaced or the other libero.
- There must be a completed rally between two libero replacements (except for injury or penalty situations).
- Replacements happen while the ball is out of play and before the whistle for service, through the replacement zone on the bench side.
- Libero replacements are not substitutions. Do not count them against the sub limit (FIVB 6, NCAA women D1 15 and D2/D3 18, USAV 15, high school 18).
- Libero serving: USA Volleyball, high school and NCAA women allow one serving position per set. Write it in the box. FIVB and NCAA men: the libero does not serve.
- Two liberos: log both numbers at the top. Either may replace a back-row player; they may replace each other.
- Quick check before every serve: is the libero in the back row (positions I, V or VI) and is it a legal replacement?

Always check your league or tournament rules, which can add their own libero procedures.
