Hitting stat sheet

Team: _____ Opponent: _____ Date: _____

Tally every swing: K = kill, E = attack error, 0 = kept in play. TA (total attempts) = all three. Hitting % = (K - E) / TA.

		Set 1			Set 2			Set 3			Set 4			Set 5			Match totals			
#	Player	K	E	TA	K	E	TA	K	E	TA	K	E	TA	K	E	TA	K	E	TA	PCT

Team totals: K _____ E _____ TA _____ Team hitting % _____

Worked example: 15 K, 4 E, 30 TA -> (15 - 4) / 30 = .367

Kill: the attack scores (a block-out off the blocker's hands counts). Error: hit out, into the net, blocked down for a point, or a violation on the swing. Free balls and accidental overpasses are not attempts.

Serving and passing stat sheet

Team: _____ Opponent: _____ Date: _____

Serving: tally every serve. Passing: rate every serve-receive pass 3 (perfect) to 0 (error or ace).

		Serving					Serve receive (0-3 scale)					
#	Player	Serves	Aces	Errors	Serve %	Ace %	3s	2s	1s	0s	Passes	Pass avg

Formulas: Serve % = (serves - errors) / serves. Ace % = aces / serves. Pass avg = (3 x 3s + 2 x 2s + 1 x 1s) / passes.

Pass scale: 3 = setter has every option, 2 = setter can still run a middle or one pin, 1 = only a high ball outside, 0 = reception error or aced. Over 2.0 is a solid team average.
